

# Power Business Decisions With Cloud-Scale Analytics

Microsoft Fabric One-Pager

**Note:** This presentation can be delivered live by BlitzAdvisy, ensuring an interactive and engaging experience for you

# Microsoft Fabric - Drives Business Decisions

At BlitzAdvisy, we know that you are aiming to get more value and efficiency by seamlessly integrating your various data systems for quicker, smarter, and connected insights.

So, what about **Microsoft Fabric**?

# Power Your Data Potential

From data integration and engineering to business intelligence and real time analytics, Microsoft Fabric enables data professionals to host your analytics workloads in a SaaS-based, lake-first solution - eliminating your organizational siloes!

What do we see?

- One in two organizations are seeking to **automate workflows** to **decrease errors** and **improve customer satisfaction**
- Leaders **increase investment** in data and analytics

Is this you? Let's check out what Microsoft Fabric is!

01

### Single Source of Truth

Create a central hub for easy analysis by merging cloud and on-prem data. Manage your data effectively, paving the way for advanced analytics. Simplify processes and help your data engineers develop analytics tools quickly.

02

### Data Analytics Models

Create custom analytics models to fully use your data. Make machine learning and AI models directly where your data lives, without moving it. Allow data scientists to analyze big data quickly using familiar tools and languages.

03

### Data Governance

Manage your data smartly and safely. Use data governance to make sure your analytics are secure and scalable, helping your team find and use data when they need it, simply and efficiently.

04

### Advanced Analytics Growth

Provide your data professionals with powerful, user-friendly analytics tools for quick, real-time insights. Build intelligence across applications for improved decisions and significant change.

01

Lake-centric and open

02

Role-specific tools

03

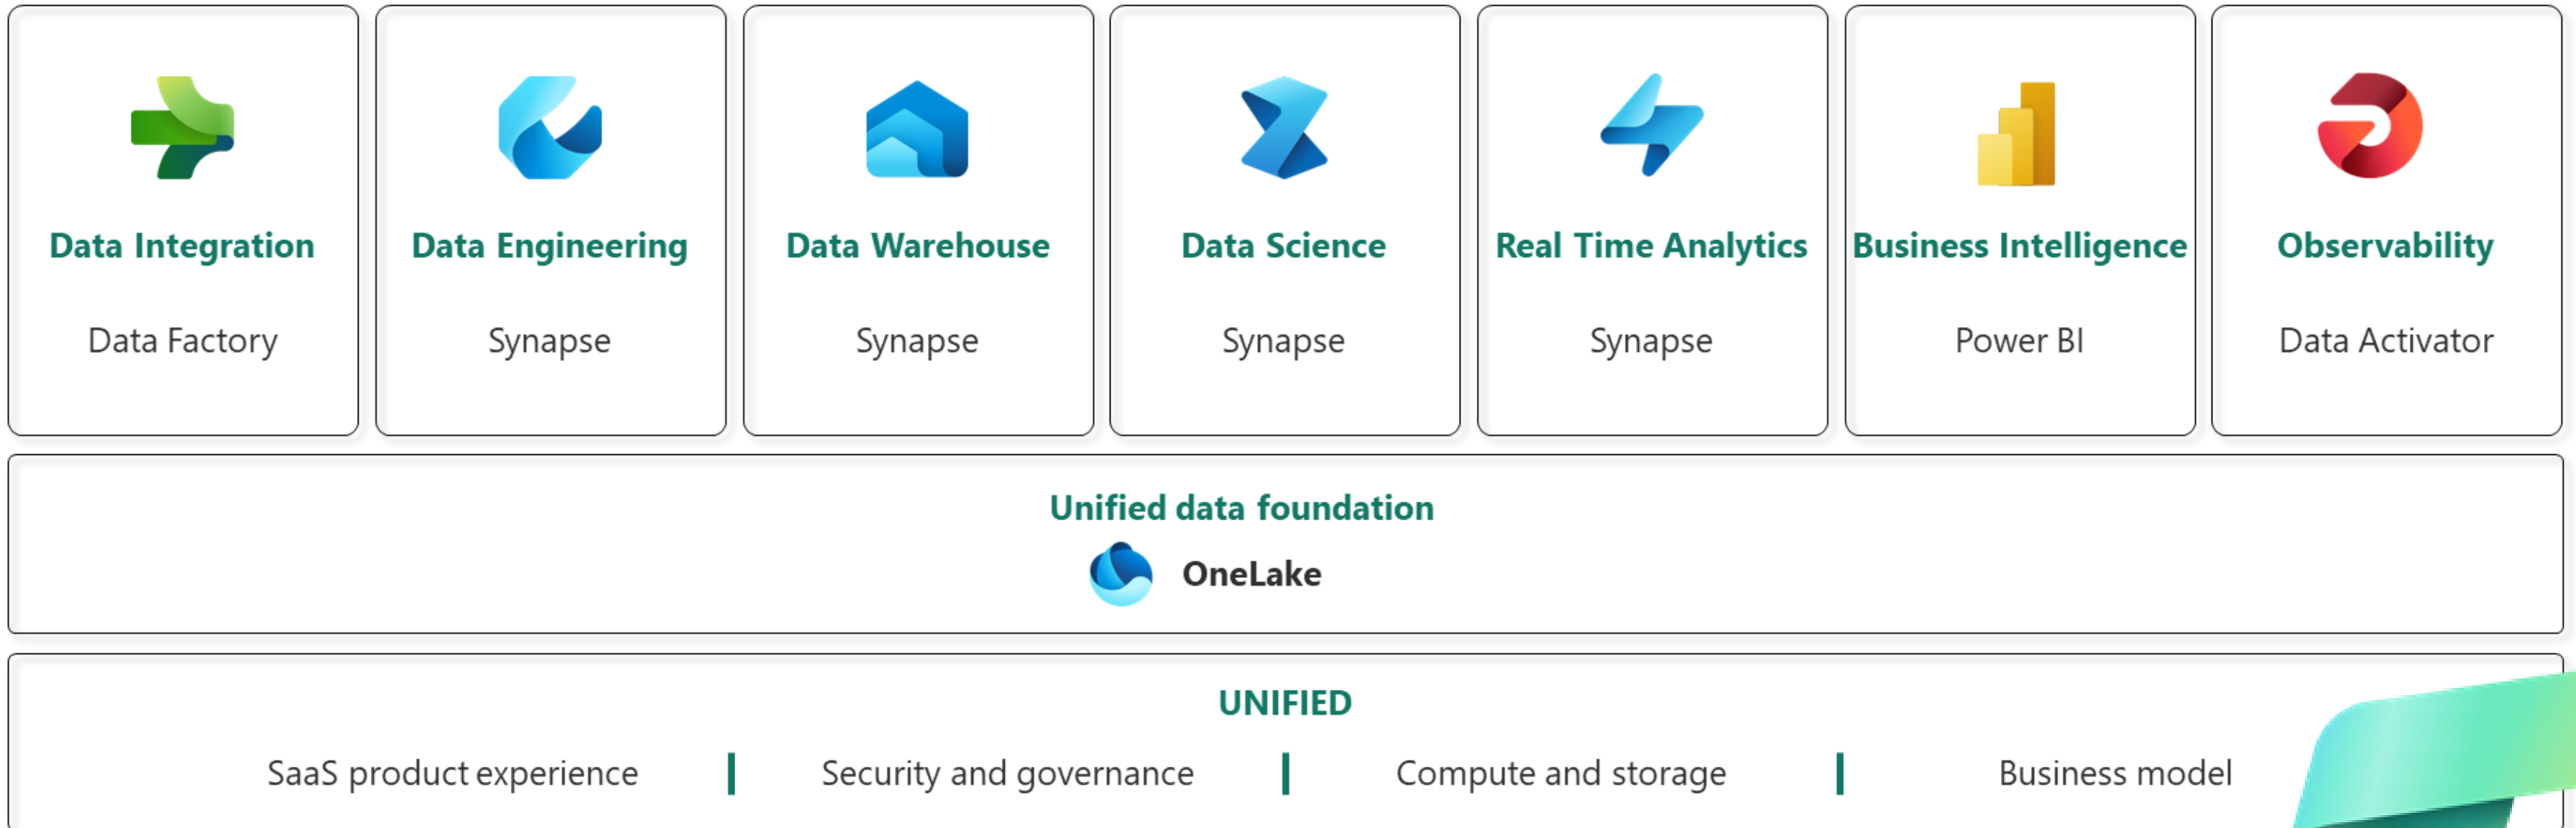

Empower every Microsoft 365 user

04

Persistent governance and security

# Microsoft Fabric Does It All - In a Unified Solution

Connect

# What's Next?

An end-to-end analytics platform that brings together all the data and analytics tools that you need to go from your data lake to your business users and customers.
